## HARVEY GULF DEPLOYS ADVANCED LOGISTICS' SOFTWARE APPLICATIONS

LAFAYETTE, La. (Nov. 11, 2014) –[Harvey Gulf International Marine](#), a major supplier of marine transportation that specializes in providing offshore supply and multi-purpose support vessels for deepwater operations in the U.S. Gulf of Mexico, recently deployed Advanced Logistics' marine management system, [SAMM](#), and preventative maintenance module, [Preventer](#), on its fleet of marine transportation vessels.

[Advanced Logistics](#) is a leading provider of offshore marine and logistics management software. The software allows a vessel to generate numerous operational reports onboard and transmit the data to shore in a real time environment. The technology includes electronic logs, safety and crew management, commodity tracking, fuel and lube management, GPS mapping, preventative maintenance and much more coupled with an interactive web based interface for easy access to data.

"We are excited to invest in Advanced Logistics' software. We realize the importance of technology in our business and value the efficiencies it provides to our operations and clients," said Barry Autin, executive vice president and chief administrative officer, Harvey Gulf.

"Advanced Logistics is pleased to have Harvey Gulf embrace our technology," said Jeffery Svendson, Advanced Logistics president and CEO. "We are seeing additional clients gravitate toward our marine applications and we expect more industry leaders to do the same. Our real time technology will enable Harvey Gulf to improve the way they manage their billing, crew, safety, equipment maintenance and regulatory compliance."
